

Instrumentation Tubing

TMP Series

Features

- Materials: stainless steel, duplex stainless steel or nickel-based alloy
- Sizes: 1/16" to 2" and 2 mm to 50 mm
- Working temperature: -325°F to 1000°F (-198°C to 537°C)
- Pickled, or bright annealed or cold worked followed by bright annealing, machined finished external surface
- For use with FITOK 6D series tube fittings, 4:1 safety factor for the tubing and connection part of fitting and tubing
- Marked with brand, material grade, standard, specification and heat number
- Standard length: 40 in, 80 in, 10 ft, 20 ft, 1 m, 2 m, 3 m and 6 m
Customized length as per customer requirement is also available

① Materials are compliant with NACE MR0175 by default. For additional requirements, please contact FITOK.

② Enhanced-316/316L complying with GB50516-2021 Technical Code for Hydrogen Fuelling Station is available, in which Nieq is not less than 28.5%. Contact FITOK Group for more information.

③ The carbon content of tubing with outside diameter smaller than 1/2" or wall thickness smaller than 0.049" is allowed up to 0.04%.

Dimensional Tolerance

Materials	Tube O.D. (D) in. (mm)	O.D. Tolerance in. (mm)	Wall Thickness Tolerance %

Working Pressure at Ambient Temperature

Figures and tables are for reference only. No implication is made that these values can be used for design work. Applicable codes and practices in industry should be considered. ASME Codes are the successor to and replacement of ASA Piping Codes.

- ☉ All pressures are calculated from equations in ASME B31.3, Process Piping. See factors for calculating working pressures in accordance with ASME B31.1, Power Piping.
- ☉ Calculations are based on maximum O.D. and minimum wall thickness, except as noted in individual tables.
Example: " in. O.D. $\times$ 0.035 in. wall thickness stainless steel tubing according to ASTM A269:
O.D. Tolerance $\pm$ 0.005 in. / Wall Thickness Tolerance $\pm$ 10%
Calculations are based on 0.505 in. O.D. $\times$ 0.0315 in. wall thickness tubing.
- ☉ No allowance is made for corrosion or erosion.

Enhanced-316/316L, 316/316L and 304/304L Stainless Steel Tubing

Table 1 — Fractional Seamless Tubing

Allowable working pressures are calculated from an S value of 20 000 psig (137.8 MPa) for ASTM A269 tubing at -20 to 100°F (-28 to 37°C), as listed in ASME B31.3 and ASME B31.1.

For Welded Tubing

For welded and drawn tubing, a derating factor must be applied for weld integrity:

- ⊙ For double-welded tubing, multiply working pressure by 0.85.
- ⊙ For single-welded tubing, multiply working pressure by 0.80.

1/2		2100	3100	4200

Note: For gas service, select a tube wall thickness outside of the shaded area.

Table 23 — Metric

Tube O.D. (mm)	Tube Wall Thickness, mm			
	0.8	1.0	1.2	1.5
	Working Pressure, bar			
6	290	380	470	600
10		210	260	340
12		180	220	280

Note: For gas service, select a tube wall thickness outside of the shaded area.

Pressure Ratings at Elevated Temperatures

Table 24 — Elevated Temperature Factors

Temperature		Tubing Materials												
°F	°C	316/ 316L ^①	304/ 304L ^①	904L	6 Mo	Super Duplex 2507	Alloy 400	Alloy 20 ^②	Alloy 600 ^②	Alloy 625	Alloy 825	Alloy C-276 ^②	Copper	Ti
200	93	1.00	1.00	1.00	0.90	0.99	0.87	1.00	1.00	0.93	1.00	1.00	0.80	0.86
400	204	0.96	0.93	0.91	0.74	0.91	0.79	0.96	0.96	0.85	0.90	0.96	0.50	0.61
600	315	0.85	0.82		0.67	0.89 ^③	0.79	0.85	0.85	0.79	0.84	0.85		0.45
800	426	0.79	0.76				0.75	0.79	0.79	0.75	0.81	0.79		
1000	537	0.76	0.69						0.35	0.73		0.76		

① Dual-certified grades such as 304/304L and 316/316L meet the minimum chemistry and the mechanical properties of both alloy grades.

② Based on the lower derating factor for stainless steel, in accordance with ASME B31.3.

③ Using 2507 duplex stainless steel at temperatures above 482°F (250°C) may cause microstructural changes, resulting in embrittlement and reduced corrosion resistance. At 482°F (250°C), the rating reduction factor is 0.90.

To determine allowable working pressure at elevated temperatures, multiply allowable working pressures from Tables 1 through 21 by a factor shown in Table 22.

Example: Type 316/316L stainless steel 1/2 in. O.D.×0.035 in. wall at 1000°F

1. The allowable working pressure at -20 to 100°F (-28 to 37°C) is 2600 psig (Table 1, page F-07).

2. The elevated temperature factor for 1000°F (537°C) is 0.76 (Table 22, above):

$$2600 \text{ psig} \times 0.76 = 1976 \text{ psig}$$

The allowable working pressure for 316/316L 1/2 in. O.D.×0.035 in. wall tubing at 1000°F (537°C) is 1976 psig.

TCT Series

Features

- ☉ Materials: 316/316L, enhanced-316/316L or 304/304L
- ☉ Sizes: 1/32" to 1/2" and 0.8 mm to 12 mm
- ☉ Working temperature: -325°F to 1000°F (-198°C to 537°C)
- ☉ Bright annealed with machined finished external surface
- ☉ For use with FITOK 6D series tube fittings, 4:1 safety factor for the tubing and connection part of fitting and tubing
- ☉ Marked with brand, material grade, standard, specification and heat number

Materials

UNS	Grade	ASTM Standard	FITOK Designator	Composition %				Mechanical Properties

S30400/S30403	304/304L		S4	≤0.035 ^②	18-20	8-11	-				

① Enhanced-316/316L complying with GB50516-2021 Technical Code for Hydrogen Fuelling Station is available, in which Ni_{eq} is not less than 28.5%. Contact FITOK Group for more information.

② The carbon content of tubing with outside diameter smaller than 1/2" or wall thickness smaller than 0.049" is allowed up to 0.04%.

Working Pressure and Elevated Temperature Factors

Refer to the working pressure of TMP series tubing.

Ordering Information and Dimensions

Random length example

Customer requirement: coiled tubing, 316/316L stainless steel , 12 mm O. D. x 1.5 mm wall thickness, about 150 m/coil length, total length 1500 m.

Recommended ordering number: SS-TCT-12MM-1.5-CL21M

Actual supply length is 135-166 m/coil, about 10 coils, total 1500 m.

Notes: ① Other wall thicknesses available subject to confirmation from FITOK.

② Custom length outside the Random Length Grade Table and within the max. length range available subject to confirmation from FITOK.

③ Custom shorter cut length available.

④ Custom longer length available subject to confirmation from FITOK.

Cut Length Example

Customer requirement: coiled tubing, 304/304L stainless steel, 8 mm O. D. x 1.2 mm wall thickness, 400 m/coil length, total length 2000 m.

Recommended ordering number: S4-TCT-8MM-1.2-400M

Actual supply length is 400-400.5 m, 5 coils, total 2000 m.
